

Rheumatology Nurse Survey

Do you have inflammatory arthritis or a rheumatic condition needing specialist care? Or do you provide clinical care for someone with these conditions?

Please complete our survey on the potential benefits of using rheumatology nurses to help provide care and support for people with these conditions.

People living with arthritis, their carers, rheumatology nurses and health care professionals are invited to participate.

This survey is part of a research project to examine the potential benefits of rheumatology nursing in terms of patient experience and outcomes as well as health system efficiencies and costs.

[Click here](#) or go to <http://bit.ly/2otLTTR> to take the survey

Please encourage anyone you know with arthritis or who provides clinical care to people with arthritis to also participate in the survey.
