

Help shape the future of psoriatic arthritis care.

Learn about the ICONIC-PsA 2 research study of an oral investigational medication for adults who have taken a biologic medication for active psoriatic arthritis (PsA).

To qualify for this study, you must:

- Be 18 years of age or older
- Have been diagnosed with PsA for at least 3 months prior to beginning this study
- Have at least 3 swollen joints and at least 3 tender joints
- Have active plaque psoriasis or nail changes consistent with psoriasis
- Have previously taken 1 biologic medication for PsA or psoriasis

The image depicted contains models and is being used for illustrative purposes only.

Additional study criteria will apply. All study-required visits, tests and medication will be provided at no cost. In addition, reimbursement for study-required travel may be provided.

The ICONIC-PsA 2 study is dedicated to including a diverse group of participants. This will help evaluate the safety and efficacy of the investigational medication in the diverse groups of people who may use it.

The safety and efficacy of the investigational medication have not been established.
